REVIT USER GROUP INLAND EMPIRE

September Meeting

(Back to the Basics)

Welcome! Grab some pizza and drinks and get ready for some great Networking & Revit learning!

BRIAN ANDRESEN

My top FAQ's from WLC Users so far this year:
(Not the most difficult questions, just simply the most frequent)

- 1) **Where are the Keynote Settings?** Annotate > Tag Panel (Drop Down Arrow)
- 2) **What happened to the Tape Measure?** Modify > Inquiry Panel > Measure > Measure Between 2 References (Create a keyboard shortcut "TM" for this one!)
- 3) **Where is the Window change option?** View > Windows Panel > Switch Windows (I try to always put this in the users QAT)
- 4) **How do you change the Browser Organization?** View > Windows Panel > User Interface > Browser Organization
- 5) **Where are the Revision Settings?** View > Sheet Composition > Lower right corner (Small arrow, almost as if they never want you to find it!)
- 6) **How do you add to the QAT (Quick Access Toolbar)?** Right click on the tool you want to add for the option
- 7) **Where are the tutorials?** You have to download them separately and add to *C:\Program Files\Autodesk Revit Architecture 2010\Program*. The link is below:
<http://usa.autodesk.com/adsk/servlet/item?siteID=123112&id=13080067>

STEVE STAFFORD

- 1) **Where are the “Options”?** Used to be under the Settings menu > Options. Now located on the Application menu
- 2) **Where are the Mirror Options?** No longer on the Options Bar. Now, after selecting an object, the “Modify ___” Ribbon appears. Modify tab > Mirror opt’s
- 3) **Where is the Render tool?** Open a Camera View and you will see the teapot icon on the View Control Bar
- 4) **Where are the Export configuration files?** Was File > Import/Export... Now Application Menu > Export > Scroll to the bottom of the list.
- 5) **Why is there no Link option for importing cad?** The tool itself is either “Import” or “Link” on the insert tab...so no need to choose after picking the "correct" button

BILL BROWN

- When making a family, the reference plane command is on the Create pull down, but Dimension is on the Detail pull down.....Why...Why.....??

GATHY HADLEY

- **Design Options... on the Manage Ribbon?** So you are constantly having to go back to Manage to change your active Design Options.
- **Solution:** Add it to the QAT if you use it all the time... Or... tear off the panel for design options and leave it floating while you are working...

NICK KRAMER

- 1) **Where is the room separation line tool?** On the Home tab, in the Room & Area Panel, pick the drop down under the room tool
- 2) **How do I find the license info?** Top right – drop down arrow next to help – about (not available via the large R – Licensing)
- 3) **Where are the view tag settings?** Manage – Settings
- 4) **Paste Aligned Options?** Under modify not insert (insert = x-ref/ attachment manager)

ANYONE ELSE???

- Does anyone else have something to add?
 - Tips/Tricks
 - Workarounds
 - Shortcuts
 - Issues
 - Complaints
 - Problems
 - Recommendations

REVIT USER GROUP INLAND EMPIRE

September Meeting

(Back to the Basics)

Thank you so much for attending tonight's meeting. I hope you all had a great time and look forward to seeing you again at next month's RUGIE meeting! Have a safe drive home and good night!-
